GOPINATH GURUSAMY

DYNAMICS 365 CE & POWER PLATFORM SOLUTION ARCHITECT | TECHNICAL LEAD

MICROSOFT CERTIFIED: AB-100 | AB-620 | PL-600 | PL-400

Coimbatore, India • +91 95665 68386 • itiangopi@gmail.com • linkedin.com/in/gopinath-gurusamy
Based in India | Available for global remote B2B contracts | European-hours overlap available

EXECUTIVE PROFILE

PL-600-certified Dynamics 365 CE and Power Platform Solution Architect / Technical Lead with 12+ years across CRM 2011–2016 and Dynamics 365 online/on-premises. Nine years delivering for Irish and international organisations—including four years onsite in Ireland—with deep experience in public-sector, healthcare, financial-services and regulatory environments. Combines design authority and developer leadership with hands-on delivery across Dataverse, Power Pages, C#/.NET, Azure integration, security, ALM and production troubleshooting.

ENTERPRISE SCALE
Architecture across a ~3,000-user national recruitment platform and an organisation-wide regulatory case-management transformation.

DESIGN + ENGINEERING
Owns technical direction while remaining hands-on with plugins, Custom APIs, PCF, Power Pages, Azure Functions and integrations.

REGULATED DELIVERY
Security, privacy, auditability, document governance, controlled deployment and operational resilience for public-sector programmes.

TECHNICAL LEADERSHIP
Leads Agile delivery with three junior developers; drives engineering standards, design review, code quality and release readiness.

CORE EXPERTISE

Dynamics 365 & Power Platform: Dynamics 365 CE, Customer Service, Sales, Field Service, Marketing, Dataverse, model-driven apps, Power Apps, Power Automate, Power Pages
Architecture & Governance: Solution architecture, integration design, security architecture, business units/teams, environment strategy, ALM, CI/CD, release governance, Agile delivery
Engineering & Integration: C#, .NET, plugins, Custom APIs, JavaScript, TypeScript, PCF, FetchXML, Web API, REST/OData, Azure Functions, Logic Apps, SharePoint, Application Insights
Data & Tooling: Azure DevOps, Git, SQL, SSIS, KingswaySoft, SSRS, Power BI, PowerShell, XrmToolBox, data migration and observability
AI-Assisted Engineering: Repository analysis, impact assessment, documentation, testing and code-review support

PROFESSIONAL EXPERIENCE

Lead Dynamics 365 CE Developer / Technical Lead | Codec Ireland

Jul 2021 – Present | Remote from India | Irish public-sector programmes

- Lead solution architecture and hands-on engineering for Dynamics 365 CE and Power Platform programmes, translating complex operational requirements into secure, scalable designs and governed releases.
- Own technical direction, engineering standards, design/code reviews, developer guidance, estimation, troubleshooting and release readiness across distributed Agile teams.
- Use AI-assisted workflows for repository analysis, impact assessment, documentation and test preparation, accelerating delivery while retaining human review, architectural oversight and confidentiality controls.

Irish Competition & Consumer-Protection Regulator | Solution Architecture and Development

- Architected and developed from the ground up an organisation-wide Dynamics 365 Customer Service and Dataverse case-management platform for Ireland's competition and consumer-protection regulator, leading end-to-end technical delivery across a two-phase implementation.
- Co-authored the Solution Design and led three junior developers across the complete case lifecycle—from intake and assessment through investigation, evidence, correspondence, approvals, enforcement outcomes and closure.
- Designed secure external information and evidence submission using Power Pages, Azure Functions, Dataverse Custom APIs/plugins and SharePoint document storage, with Application Insights telemetry and failure diagnostics.
- Delivered a configurable cross-environment synchronisation service with incremental processing, field mapping, team assignment and actionable notifications; built PCF controls for document upload, approval visibility and Eircode/address lookup.
- Developed an offline-first inspection PWA with Dataverse synchronisation, local persistence, recoverable outbox, validation and retry handling; strengthened privacy through DSAR anonymisation and least-privilege security design.

- Governed Azure DevOps delivery for Dataverse and non-Dataverse assets using managed solutions, environment-specific configuration, traceability, controlled promotion and source-control protection.

Irish National Healthcare Organisation | Solution Architect & Technical Lead

- Led technical direction for a national healthcare recruitment platform's transition from a legacy organisational structure to a hierarchical regional operating model across an estate serving approximately 3,000 users.
- Designed the Dynamics 365 business-unit, owner-team, role and record-ownership approach for new regional operations while preserving controlled visibility of legacy job orders and amendments.
- Shaped centrally maintained approver/submitter configuration and portal routing, replacing fragile manual selection with governed reference data, dynamic regional filtering and permission-aware approval behaviour.
- Directed coordinated changes across multiple Dynamics 365 and Power Pages environments, SharePoint and 20+ Power Automate flows covering job orders, amendments, campaigns, panels, ownership, synchronisation and notifications.
- Defined environment and transition considerations for isolated DEV/UAT delivery, parallel support releases, legacy-data coexistence and secure cross-system metadata synchronisation.

EARLIER EXPERIENCE

Senior Dynamics 365 CE Developer | Central Bank of Ireland

Apr 2019 – Apr 2021 | Dublin, Ireland

- Translated business and technical requirements into maintainable Dynamics 365 designs in a highly regulated enterprise environment; developed plugins, workflows and JavaScript and supported quality-focused Agile delivery.
- Designed and documented application architecture, delivered KingswaySoft data migration and collaborated with business, architecture, testing and engineering stakeholders.

Dynamics CRM Developer | OpenSky Data Systems

Jan 2017 – Apr 2019 | Naas, Ireland

- Designed Dynamics CRM solutions and integrations spanning ESRI mapping, SharePoint document management, server-side email, Azure Functions, Logic Apps and Power Automate.
- Automated deployments through Azure DevOps and configured customer-facing experiences using The Portal Connector and Dynamics portals/Power Pages.

Microsoft Dynamics CRM Developer | GSR Business Services Pvt. Ltd. / FLSmidth

Sep 2013 – Dec 2016 | Chennai, India | International client delivery

- Developed plugins, workflows, JavaScript, FetchXML and SSRS solutions across Microsoft Dynamics CRM 2011, 2013, 2015 and 2016; created custom HTML/ASP.NET components and resolved CRM Email Router issues.
- Delivered super-user training at the client location in Denmark and supported international stakeholders through implementation, issue resolution and knowledge transfer.

SELECTED ARCHITECTURE CAPABILITIES

Platform Architecture	Security & Governance	Integration & Reliability
Dataverse information models	Business units, teams and roles	Azure/API integration patterns
Model-driven and portal design	External-user and document security	Cross-environment synchronisation
Low-code vs pro-code decisions	GDPR/DSAR and auditability	Offline-first and retry patterns
Scalability and non-functional design	Environment and release governance	Telemetry and production diagnostics

MICROSOFT CERTIFICATIONS

Power Platform Solution Architect Expert (PL-600) | Power Platform Developer Associate (PL-400)
Power Platform App Maker Associate (PL-100) | **AB-100 Agentic AI Business Solutions Architect**
AB-620 AI Agent Builder Associate | MCSE Business Applications | MCSA Dynamics 365
MB2-707, MB2-715, MB2-716, MB2-718 | ICAgile Fundamentals

EDUCATION & LANGUAGES

Bachelor of Technology in Information Technology | Kongu Engineering College, India | 2009-2013
Languages: English - Professional proficiency | Tamil - Native proficiency
